

Noise Management Program

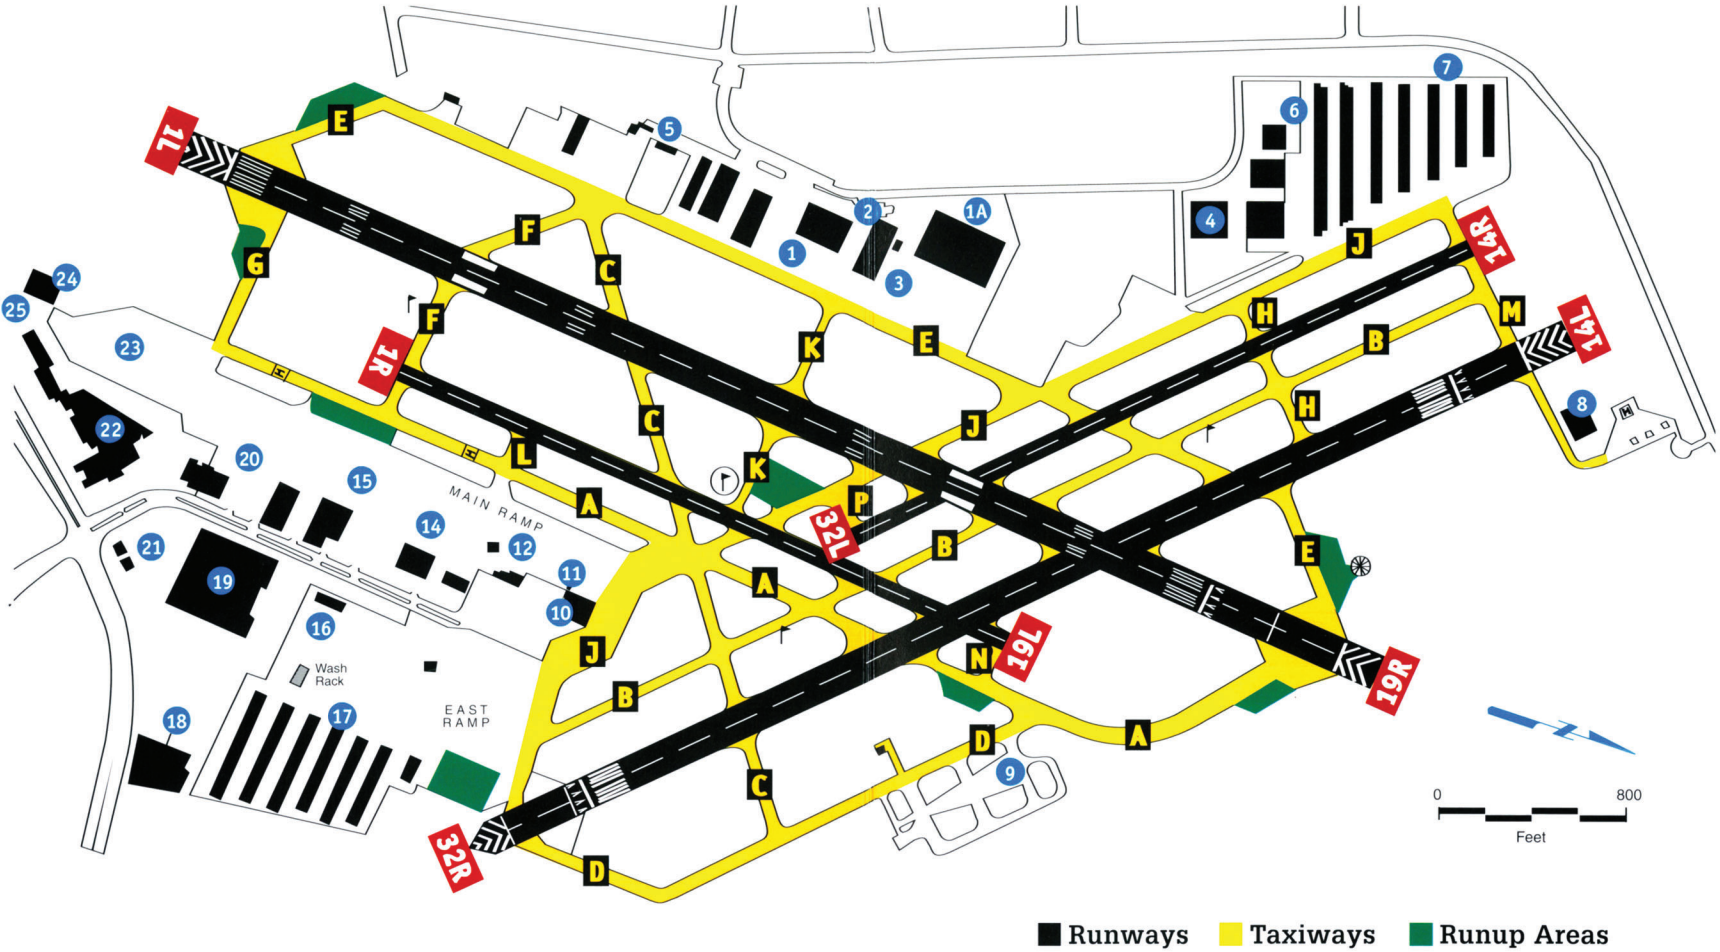

Buchanan Field Airport, located in Concord, California, is a public facility owned by Contra Costa County. As such, the County has a responsibility to provide Airport users a safe, efficient facility with access to the national airspace system. By the same token, the Airport must also be sensitive to community concerns and operated in such a way as to minimize the affects of aircraft noise on the community.

Airport staff is asking that each pilot help by giving some thought before every flight in, to and out of Buchanan Field Airport. How can each pilot make changes that can reduce or eliminate the concerns expressed by Airport neighbors? For example, can the flight be conducted at a less disruptive time of the day? Does the aircraft manufacturer publish noise abatement procedures for your aircraft/engine/propeller? Can the flight land or depart in a direction that minimizes impacts to the community? Contra Costa County Airports greatly appreciates everyone's assistance in thinking through this matter. Everyone wins when a pilot makes a choice to be a good neighbor!

The Noise Management Program for Buchanan Field Airport is directed toward pilot education and cooperation. This brochure has been developed to assist you in operating your aircraft as quietly as possible.

Responsible pilots make all the difference!

Note:
Safety always supersedes noise abatement procedures.
